# KEEPS YOUR CITY **CLEAN.**

First impressions count. This does not only apply to people but also to towns, cities and municipalities. Neat and tidy public green areas, roads and paths do not only contribute to a good image for visitors and the local inhabitants, but are also a sign of a council which works perfectly. And they encourage people to keep the city clean and tidy. As far as cleaning is concerned, many details and secondary effects are important, especially as viewed by a critical public.

For many years now, Green Machines have aimed to contribute decisively towards cleaner and tidier towns and cities by providing efficient and sophisticated sweeping machines. We have managed to enhance the performance

of all Green Machines with conventional drive systems thanks to a host of clever details. For a city, its inhabitants, the environment and for all those who handle it on a daily basis. Welcome to Green Machines!

# 636

No chance for dust and dirt.

In busy city centres, in car-parks and other outdoor areas requiring professional sweeping, the 636 leaves only one thing: a positive impression. By reducing water consumption considerably and with its sophisticated design details, it cuts labour and maintenance costs.

# FINE DUST HUNTER AND GATHERER.

**A really special  
sweeper.**

# TECHNICAL SPECIFICATIONS.

636

**SWEEPING SYSTEM**

Working width: minimum (brushes retracted)	1,300 mm
Maximum (brushes extended completely)	2,050 mm
Capacity of container for sweepings	1.5 m <sup>3</sup>
Material of container for sweepings	stainless steel

**DUST CONTROL SYSTEM**

Dust filtering	Three-stage filtering
Stage 1:	Cyclone swirl plate with lateral openings
Stage 2:	Flat filter made of stainless steel
Stage 3:	Double cyclones
Dust control system	Standard
CloudMaker®	12 vanes made of steel alloy
Vacuum impeller	

**DRIVE SYSTEM**

Standard engine	Kubota 1505T
	Diesel
Suspension: front and rear	Completely independent
Driving speed*	up to 40 km/h
Sweeping speed	0 – 13 km/h
Front wheel gauge	
Sweeping mode	1,130 mm
Transit mode	1,400 mm

**MACHINE DATA**

Length: Standard machine	3,450 mm
Width: Machine width	1,140 mm
Height: Warning lamp folded inwards	1,980 mm
GVW	2,550 kg
Wheelbase	1,400 mm
Turning circle	
Curb to curb	3,250 mm
Wall to wall	4,100 mm
